

Eventure Together

Find Your People. Find Your Place.

An Android App By

Enrique Ramirez-Holston, Jareth Rawlings, Julian Dalley,
& Luke Ludlow

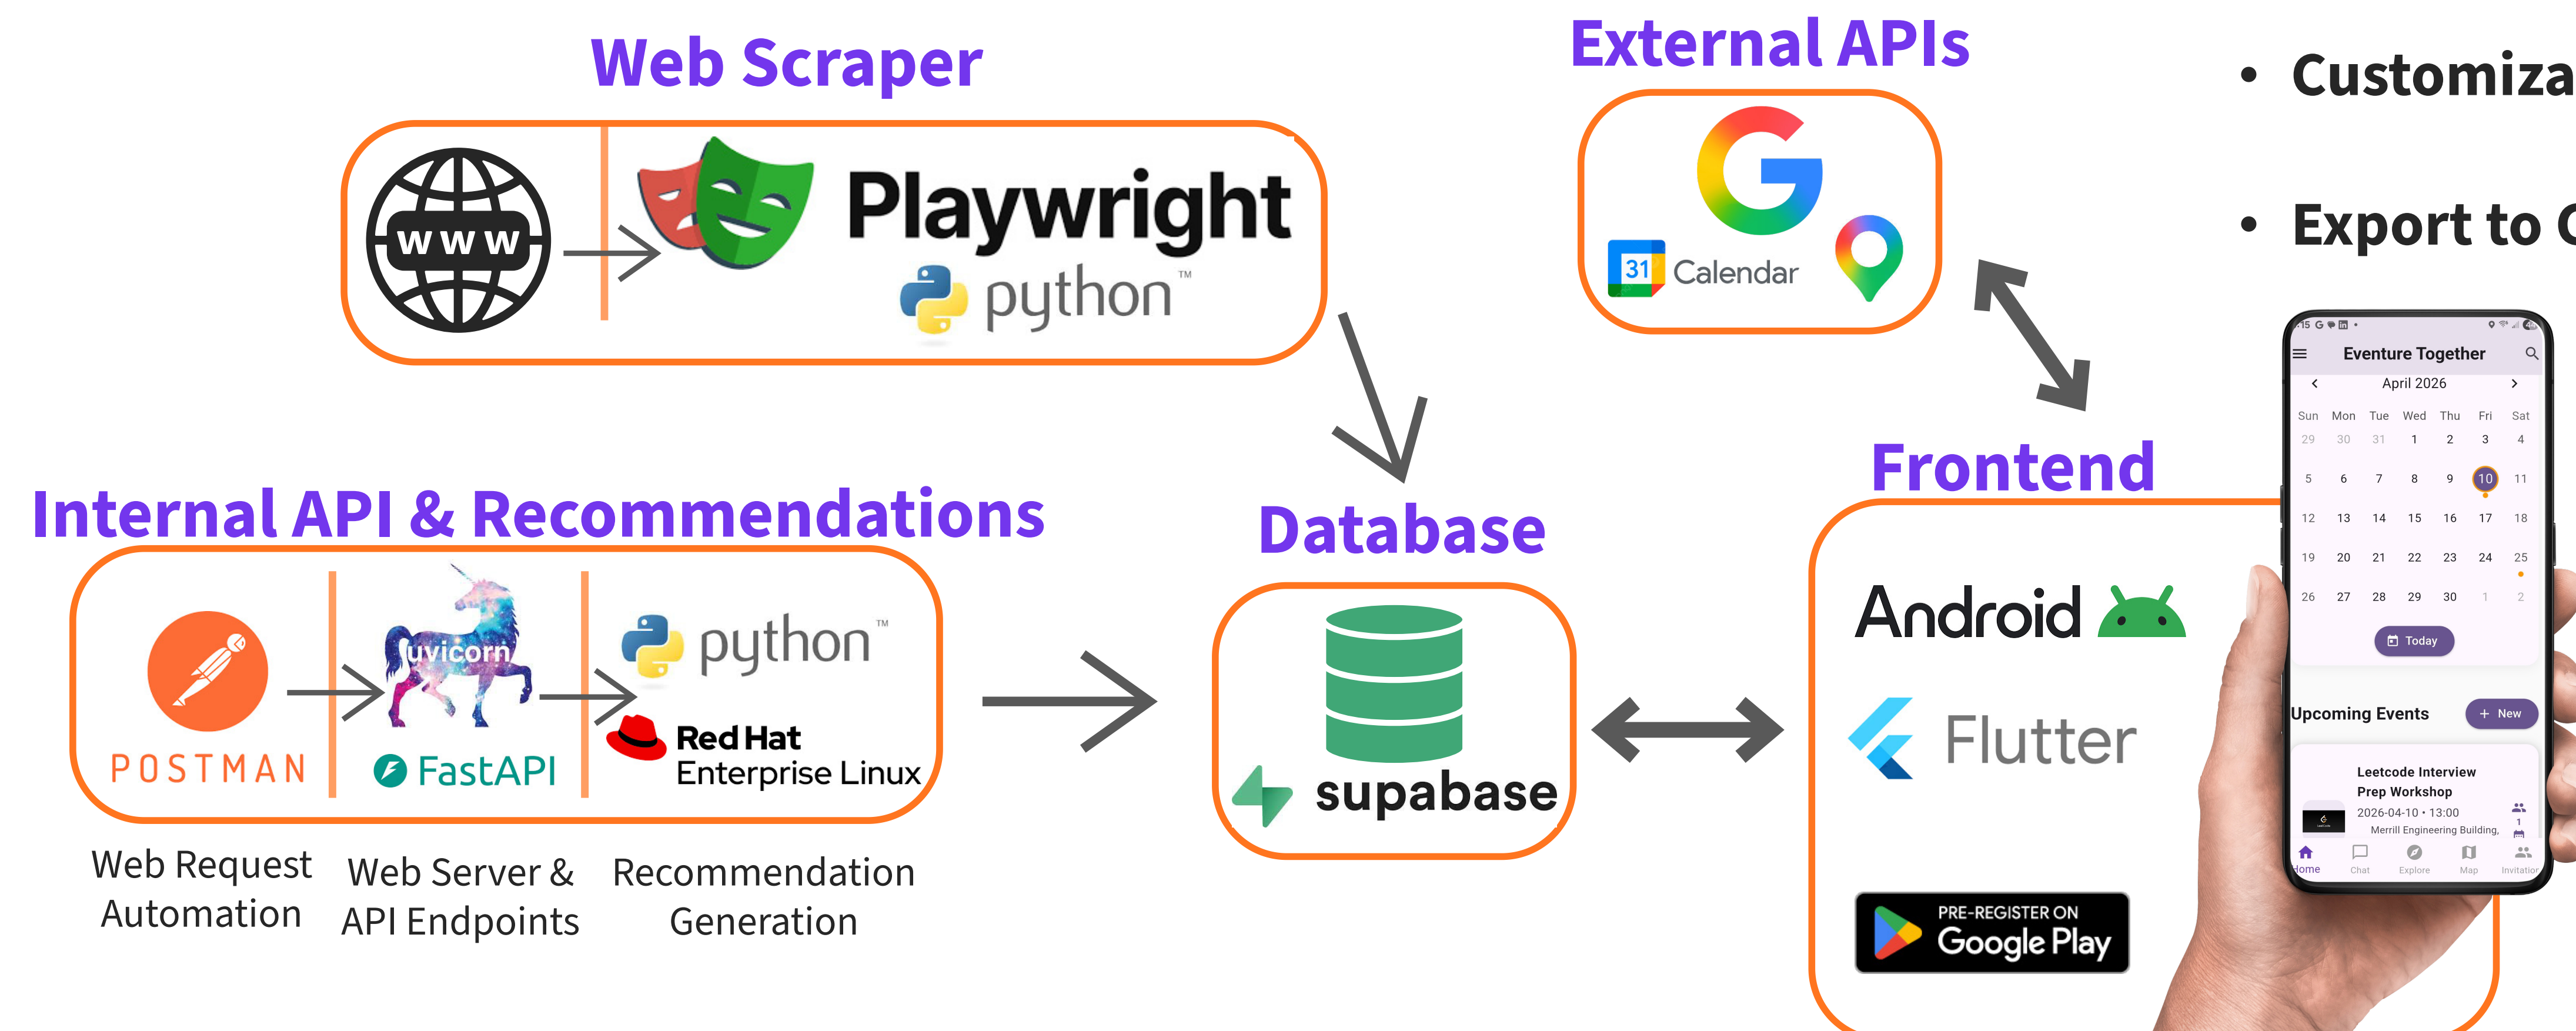

KAHLERT SCHOOL OF COMPUTING
THE UNIVERSITY OF UTAH
CS 4500 / Spring 2026

Why This Project?

As college students, there are a lot of parties and events happening on campus. But when we went, we didn't know a lot of the people there, so we just end up grabbing food and leaving within the first hour. So we wanted to create something facilitates meeting people, so you're able to go to the events with them so everyone can have a better experience.

System Architecture

About

An android app that allows users to make meaningful connections and facilitate participation in social activities.

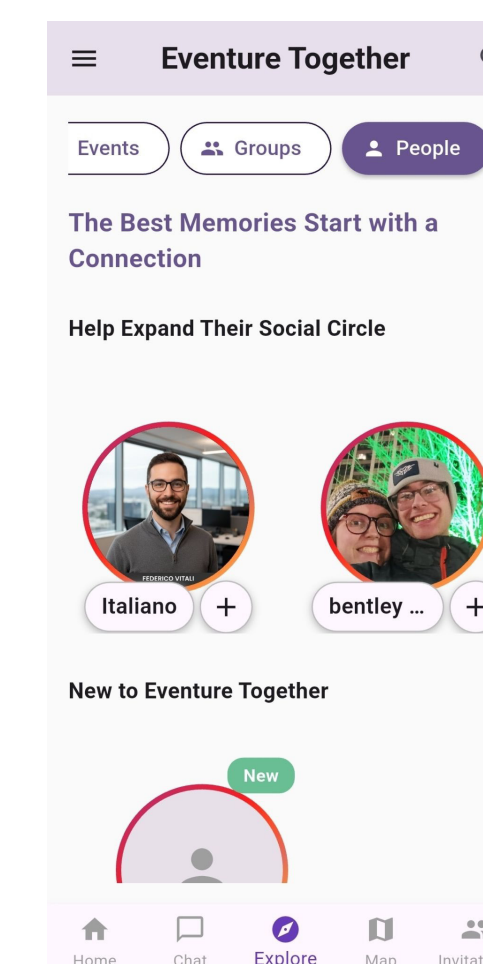

Key Features

- Recommendations
- Web Scraper
- Customizable Theme
- Export to Google Calendar

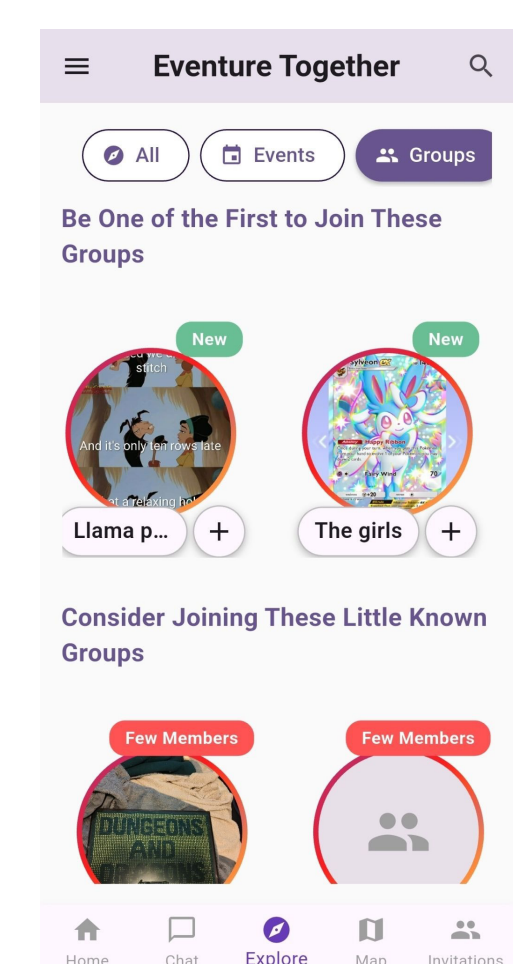

Download & Try It Out!
